

Wireless content sharing has never been easier

PAINLESS AND WIRELESS

Making it easy for users to connect and share by a browser-based secure solution. No more dongles or new software applications required.

PERSONALIZED

Easily find colleagues to call directly, and get your preferred rooms listed. A personalized experience through integration with Exchange and Active Directory.

WORKS FROM REMOTE LOCATIONS

In the room or connecting remotely, all have the content sharing capability and full collaboration enabled. Regardless of where you are.

CORE CAPABILITIES

Cyviz Easy Connect helps you find the room, effortlessly connect, and present your computer content in seconds. The biggest challenge with wireless sharing solutions is to make the experience easy, safe and secure. Cyviz Easy Connect has solved all of these challenges in an elegant and simple manner.

Easy Connect is a network centric solution based on standard web technologies. It allows users to present content from computers in rooms controlled by a Cyviz Easy Controller.

The Cyviz Easy Controller ensures that content is not shared on the wrong screen, by accident or intentionally. Multimedia is streamed using WebRTC, a standard protocol that offers a multitude of benefits. It supports complex network topologies, firewall traversal, secure connection and encryption of content.

SUPPORT & MANAGEMENT

Monitoring, management and upgrading of Cyviz Easy Connect are done through the Cyviz Easy Server. The IT based architecture makes remote support and maintenance possible, and in effect saves time and resources.

MULTIPURPOSE USE OF DISPLAYS

With support for HTML based signage content, Easy Connect adds a new dimension to your meeting rooms. When not in use, displays can be turned into corporate signage channels.

Easy Connect can also be integrated with your building management alarm systems, so meeting room displays can be used to present life saving information in case of an alarm. A range of integrations are available, and room specific escape plans can be defined and managed from the Cyviz Easy Server.

CYVIZ CONNECT RECEIVER

The Cyviz Connect Receiver is used together with Cyviz Easy Connect. It is a single purpose appliance equipped with the Cyviz Easy Connect Receiver software.

CYVIZ EASY PLATFORM

The Cyviz Easy Platform consists of hardware and software which together creates the flexible and scalable platform for controlling and managing advanced visualization and collaboration systems. Cyviz Easy Connect is a functionality offered as a part of this platform.

CYVIZ EASY SERVER

The Cyviz Easy Server is a web-based tool for remote management, support, diagnosing and upgrading Cyviz Easy Controllers and Cyviz Connect Receivers.
