Cyviz Environmental Statement

At Cyviz, we are at the forefront of the digital collaboration revolution. Our vision is to strengthen our position as the global partner of choice for next-level collaboration.

Our environmental statement focuses on contributing to a better planet. We intend to achieve this through our direct actions and strategic relationships, ensuring best practice and sustainability compliance throughout our organization and supply chains.

Cyviz’ activities will directly or indirectly support the United Nations Sustainable Development Goals, including SDG 9 Industry, Innovation & Infrastructure and SDG 13 Climate Action.

Our commitments

Planet

- Analyze and reduce the carbon footprint per employee and/or project in our own operations and our value chain.
- Reduce the resources we use in our operations and value chain, including energy and e-waste.
- Business travel has a sizeable footprint on the environment. By design, our products may replace business travel and increase efficiency and collaboration for our customers. We will continue to develop our products and solutions to enable customers to reduce the need to travel, positively affecting their carbon footprint.

People

- Maintain compliance with local and international regulations in sustainability governance through reviews and audits.
- Establish sustainability education within our organization to improve employees’ understanding and engagement across sustainability areas with a focus on climate change.
- Encourage reduction in business travel in our own operations and value chain where other solutions may give similar results.

This Environmental Statement will be reviewed annually.
